

Hampton Beach Renourishment – Works by DELWP

SYC 3

Between 12 Feb & April 2018, sand will be pumped from an offshore area (primary dredging area) to the Hampton Beach.

The contractor will operate a dredge in this area & the sand will be pumped via a pipe.

This pipe is 300mm in diameter & will run from the barge, down to & along the seabed.

SYC will place an orange inflatable clearance mark 200m west of the dredging area that is required to be passed on its western side.

Sail Committee will issue the relevant changes to our racing documents.

 Orange Inflatable Clearance Mark

Primary Dredging Area

Secondary Dredging Area

Dredge "Ballina"
